

## Middle Aged Women

Women should take warning from such symptoms as heat flashes, shortness of breath, excessive nervousness, irritability, and the blues—which indicate the approach of the inevitable "Change" that comes to all women nearing middle age. We have published volumes of proof that Lydia E. Pinkham's Vegetable Compound is the greatest aid women can have during this trying period.

### Read About These Two Women:

Frement, O.—"I was passing through the critical period of life, being forty-six years of age and had all the symptoms incident to that change—heat flashes, nervousness, and was in a general run-down condition, so it was hard for me to do my work. Lydia E. Pinkham's Vegetable Compound was recommended to me as the best remedy for my troubles, which it surely proved to be. I feel better and stronger in every way since taking it, and the annoying symptoms have disappeared."—Mrs. M. GORDON, 223 Napoleon St., Fremont, Ohio.

Urbana, Ill.—"During Change of Life, in addition to its annoying symptoms I had an attack of grippe which lasted all winter and left me in a weakened condition. I felt at times that I would never be well again. I read of Lydia E. Pinkham's Vegetable Compound and what it did for women passing through the Change of Life, so I told my doctor I would try it. I soon began to gain in strength and the annoying symptoms disappeared and my Vegetable Compound has made me a well, strong woman so I do all my own housework. I cannot recommend Lydia E. Pinkham's Vegetable Compound too highly to women passing through the Change of Life."—Mrs. FRANK MASON, 1316 South Orchard Street, Urbana, Ill.

Women Everywhere Depend Upon

### Crop Sometimes Fail, Though.

Some of the fruits of filiation are wedding dates and bridal pairs.—Boston Transcript.

### Yea, Verily!

A stack of chips is often a chimney stack through which a man's money goes up in smoke.—Boston Transcript.

It radiated "home" in a measure all out of proportion to its size. The daughter of the house had chosen it as her own little apartment because of its sunny bay window. "Thanks to the National Biscuit Company and the other good things," said the hostess, "we live well with a minimum of expense."

It was the birthday of the daughter, and the hostess had planned a special treat. She had ordered a box of National Biscuit Company's "Unedea Biscuits" and was now opening them. The package was large and sturdy, and the biscuits inside were of a golden brown color, and had a delicious flavor.

The package bespeaks favor for the contents—the contents bespeak favor for all time. What wonder that this perfect soda cracker has entrenched itself as a staple diet in all climes and with all sorts and conditions of society? You should eat them always and often!

**NATIONAL BISCUIT COMPANY**

"Chicken sandwiches," the young hostess announced. Then out would come a box of Unedea Biscuits and a jar of potted chicken. Nimble fingers would set to work and in a twinkling little piles of chicken sandwiches were ready for the guests.

## WEATHER KEEPS NC-4 IN PORT

Too Unfavorable for Resumption of the Trans-Atlantic Flight

ADMIRAL JACKSON NOTIFIES NAVY

Sea Rough and Rain Squalls Expected in Next 12 or 18 Hours

Washington, D. C., May 23.—Weather conditions at Ponta Delgada still were unfavorable for resumption of the trans-Atlantic flight by the seaplane NC-4, Admiral Jackson early today notified the navy department. His message said the sea still was rough and rain squalls were expected within the next 12 or 18 hours.

SAW PLANE'S RED LIGHT IN MID-ATLANTIC

Ship Reports Seeing the Mark Early Monday and on Course Which Hawker Might Have Been Expected to Take.

London, May 23 (By the Associated Press).—The cableship Faraday reports that it sighted the red light of an airplane during the early hours of Monday at 50 degrees 28 minutes north latitude and 30 degrees west longitude, approximately midway between England and Newfoundland, and in the course which would have been followed by Harry G. Hawker in his attempted flight between the American continent and Ireland.

NEED FOR Y. M. C. A. SERVICE SET FORTH

Four Speakers Addressed Conference of Washington County Men at Montpelier Thursday Afternoon.

Some 27 men selected from different towns in Washington county attended a conference held at Montpelier Thursday afternoon following a luncheon, at which four speakers discussed the work which can be done by the Y. M. C. A. in India, China, the Balkan states and Russia now that the war is over and stated that the natives of these countries have seen what the Y. M. C. A. has done. These speakers were Owen Pence of Constantinople, M. F. Kennedy, recently returned from India, W. J. Wen, who goes to China to take up the work, and William W. Banton, who was in Russia during the worst conditions connected with the war. All were very interesting speakers.

Mr. Pence was the first speaker and told how the nations above referred to are asking for the Y. M. C. A. help, instead of the organization seeking the extra work. The organization is trying to develop these countries so that self-leadership may occur. He spoke briefly of the problems which the nations are confronting; that the men who headed the work in the great war when it broke out were men who had worked long in these eastern nations; that the organization was working in the belligerent countries long before America realized what the war meant.

He told interestingly how General Petain asked for the organization to bring up the morale of his men. Italy now desired the work among her citizens; Rumania, with its 4,000,000 people and a great expansion of territory since the war is over, needs it and has sent appeals for it as a result of four little huts conducted during the war. Constantinople must have more of it. The Greeks ask it so that Turkey may be saved, although this is a different nation. He said the war has jarred open the door of every eastern nation for the Y. M. C. A. work.

Mr. Banton said the work in Russia was a race against time and that before they could get the work well established the army, under the German propaganda, broke to pieces, but even then the Y. M. C. A. men did not leave, but carried along the work. He claimed that Russia helped save the lives of a great many Americans because they fought in France until this nation was ready to enter the war. He told some interesting facts about the condition of Russia, a nation with a future once it comes into its own, and that this must occur through the efforts of the Y. M. C. A. or similar organizations. The Russians have not lost faith in the Americans and the work is being carried on there now.

Mr. Wen spoke of the work that has been done in China and there are now 220 Chinese secretaries in that country and they are training more. Men from the official circle have seen the value of the work and are leaving their official jobs to take up the work. The Y. M. C. A. men means in the country but they must have American trainers for a time yet and this means expense. He told some interesting data as to what China has done in the war and the result of their need for this work. When the organization asked for \$100,000 from China they raised \$1,250,000. There were 150,000 Chinamen working in France during the war. They must go back to China with a different opinion of the Christianized nations than they received behind the firing lines.

Mr. Kennedy called attention to the fact that 1,000,000 soldiers from India were holding the lines in France when England, Canada and other countries were not able to get their forces there. He told of the human lives sacrificed because they did not have training. He gave a dramatic story of the tragedies of the first winter of the war when the Indians suffered great losses and of the obligation that America owes these people and must now help meet. He told how the Y. M. C. A. secretaries, while not recognized by the army of England, went along with the troops from India. The Indian has always knelt to the white man but they could not understand why the white man did the Indian's manual work when they went into war, citing the cutting of hair, which was the lowest type of occupation to the mind of the Indian. He also spoke of the excellent work done in Palestine, Africa and other fronts. No other nation could have done what these nations have done.

Vermont is expected to raise \$10,000 for Y. M. C. A. work in these nations.

Turkish  
Tobacco

# HELMAR

A tin spoon costs less than a silver spoon.

"Bundle" cigarettes cost less than Helmar 100% pure Turkish—the Mildest and Best tobacco for cigarettes.

If you don't like Helmar return the package and get your money back.

We are anxious to have you spend your money for your money's worth—that's why we call your attention to Helmar.

*Sharquros* Makers of the Highest Grade Turkish and Egyptian Cigarettes in the World

## Quality-Superb

## Of course, you want a Fordson

THE Fordson is an ideal tractor for your farm. It is built compactly, simply, yet with abundant power. It pulls a two bottom plow and will do a proportionate amount of any other farm power work.

The Fordson engine is unusual. It is simple, easily cared for, and so designed that the farmer can

give any attention required in service. The entire head of the cylinders, which are cast en bloc, can be removed for grinding valves.

The air is cleaned with an improved air washer. A special carburetor allows the use of kerosene—without any of the trouble that is commonly associated with this fuel.

The Oliver No. 7 Plow was built for your Fordson

The Oliver No. 7 plow in addition to being specially adapted to the Fordson tractor has all its well-known Oliver features. It buries the weeds and trash; it is operated from the driver's seat; the furrow is always kept at the same depth by a special stop device; in fact, it is an ideal tractor plow designed for that one purpose only.

See it here with the Fordson tractor.

The farmer who owns a Fordson Tractor is a well-to-do, progressive, business-like farmer, eager to obtain the better results that come from power farming. Let us demonstrate with our plow and harrow on your farm.
